Why Billboard?

The billboard feature lets you design a message that will display on all clocks. Use it to announce inservices, meetings, the company picnic, or 401K enrollment opportunities:

"I've been taking care of the 401K plan since 1999 and every quarter... we get 5-10 enrollments. This last quarter I had my message set-up on the time clock, instead of the usual number of enrollments, we had 71 and we had more than 50 Contribution changes for this quarter. Wow, did it work or what? This is the most successful enrollment period I've had since our plan began thanks to the capabilities of our new JBDev Express Time Clock."

HR Generalist
Good Samaritan Hospital

Prime Extends Express System

We are pleased that Prime Healthcare is extending the Express system throughout their network. Centinela Hospital Medical Center has just finished installing the system. Montclair Hospital Medical Center, Encino Hospital Medical Center, San Dimas Community Hospital, and Garden Grove Hospital Medical Center will be live on Express within the next few months. We are happy to have you on board and promise to continue providing the quality software and services you expect from the JBDev team.

"Who's Badged IN" Report

Highly Anticipated Report - Who is at Work Now is now available. Many of our users have requested a report that will list, and count, everyone working at a specified time. For example, how many employees were working last Monday at 10:00 am. How many people are working now?

So you could get this information, we added option "Who's Badged IN" to the TM450- IN Time Window report. This will be available in the upgrade to Revision 9.80.

Upcoming Webinars

24-Hour Day

Thursday | July 10 - 2:00 pm
Thursday | July 24 - 11:00 am

Manager Reports

Wednesday | July 9 - 2:00 pm
Wednesday | July 23 - 9:00 am

Floating Departments

Thursday | July 10 - 2:00 pm
Wednesday | July 30 - 9:00 am

Company Update

TM316 for Timekeeping Support has been Discontinued

Because significant resources would be needed to keep the old clocks running with Express, as of 12/31/2010 we will no longer support the old-style clocks (using the TM316 service) for timekeeping.

Now Available

New 15" Biometric Terminals are Available these Replace the 13" Terminals.

They allow you to use either magnetic stripe or proximity badges, as well as fingerprints to identify an associate before they can access the terminal. The 13" terminals will no longer be available.
